

**REFRIGERATED ONLINE
GROCERY PICKUP**

**Trusted Partner in
Temperature-Controlled
Storage Solutions**

REFRIGERATED ONLINE GROCERY PICKUP

FEATURES & BENEFITS

FULLY CUSTOMIZABLE

Fully customizable to ensure it meets your specific needs. Designed to be modular and expandable to make sure your Refrigerated Online Grocery Pickup fits what you want, where you want it, and how you want it.

OPTIMIZED

Engineered to fit industry-leading Nestable Online Grocery Pickup Totes. This maximizes your space and optimizes totes per cubic foot, while ensuring a perfect fit and easy access. Gone are the days of buying a Reach-In and hoping everything fits inside.

LABOR-SAVINGS

Grocery Pickup the Old-Fashioned Way: pick the order, place in tote, empty contents into cooler/freezer, hope everything fits, worry about customers being late and running out of space in the cooler, the customer arrives, re-load totes from cooler/freezer, deliver to the customer's car.

Grocery Pickup the Leer Way: pick the order, place in tote, place tote directly into the cooler/freezer, deliver to the customer's car. No space shortages. No stress. Less time.

PROTECTION

Remove an extra touchpoint to meet new health safety measures and keep groceries in better physical condition. Combine this with extra food safety precautions, like reliable temperature-controlled storage solutions. The result? High-quality, safe grocery pickups.

ORGANIZATION

Reduce order mix-ups. Increase order fulfillment accuracy by keeping orders in their totes from picking to pick up. Reduce the number of missing or damaged grocery items and keep customers satisfied.

POINT-OF-NEED

Whatever your pickup needs are, wherever your pickup lane is, we can build a grocery unit to fit it. Maximize online grocery orders and efficiencies with our custom options.
